

December 9, 2009

Greetings in Christ!

Advent greetings! Our scripture for today reminds us that even though we celebrate the birth of Christ at this time of year. He has been in, with, and through our Creator from the very beginning.

Creation and Life issues in the news: Global warming is a hoax.

Finally, the truth is beginning to be uncovered regarding man-made global warming "research." Sixty-one megabytes of confidential files from the University of East Anglia's Climate Research Unit were released onto the Internet that exposed the lack of integrity and professionalism and the petty vindictiveness of the climate "scientists" who have been promoting the warming hoax for many years.

The scary part is that the information from this "research institution" has been relied on heavily for climate model-building and has been cited extensively in governmental and United Nations reports, which in turn have been used to establish harmful government policy.

Included in this material were more than 1,000 e-mails and 72 documents that are very damaging to the global-warming cabal. Here are quotes from a few them: to read more follow this link: http://www.thedailystar.com/opinion/local_story_342034507.html

Nature Watch: Most of the area lakes have frozen over except for those that are really deep. We saw one last loon around on Thursday. He may have waited too long. Yesterday a turkey was spotted on the frozen water trying to make his way across. It was comical to watch as first he went one direction then another. This sudden change in weather will catch many waterfowl unaware. Eagles will be watching for those that end up getting frozen into the water. Many animals have begun their hibernation including pocket gophers. Other animals are able to slow their metabolism way down so that they preserve as much body fat as possible. Snowfall is predicted throughout the region. This will benefit many animals that rely on it for water, for protection, and for hiding. You might think this is the end of the bug season, but for those who know where to search there are still plenty of them around. Some are buried beneath leaves and debris while others like the snow bug come out on the surface of the snow on warm days and eat microscopic organic material.

Program Information: We are pleased to announce that Lutheran Island Camp's April Women's Retreat will have a Creation and Life Issues theme this year. Dr. David Menton of Answers in Genesis will be the primary speaker. His topic will be "Fearfully and Wonderfully Made." Heather Ruesch, Christian performance artist will be providing musical leadership and a concert on Saturday evening. Watch for more information soon
We have received over 20 registrations already for the upcoming Teen Trek Winter Extravaganza with Brian Young.

From the Task Force: If you would like to schedule a presentation on our work to develop the Creation-Science Environmental Learning Center, please don't hesitate to contact us.

God's Word: ¹In the beginning was the Word, and the Word was with God, and the Word was God. ²He was with God in the beginning. ³Through him all things were made; without him nothing was made that has been made. ⁴In him was life, and that life was the light of men. ⁵The light shines in the darkness, but the darkness has not understood it. John 1: 1-4

Prayer List: 1.) Please pray for safe travel for the many people traveling in the wintry weather of the next few days. 2.) Please remember those who are ill or recuperating from accidents. Ask God to provide healing for them 3.) Pray that God would continue to open the hearts of those who hear about our projects to support them prayerfully and with their gifts. 4.) Continue to lift up in your prayers our Friends of Creation-Science, Limited Liability Company 5.) Thank God for His bounty and His goodness as we prepare to celebrate His greatest gift to us, His Son Jesus Christ.

Link of the week: <http://www.evolution-facts.org/>

Resource of the week: The following information comes from the American Family Association. Please note this is on Tuesday, the 8th: I'd like to call your attention to a very important radio/Internet simulcast tomorrow night. It's called, "[Deserting Darwin: The Galapagos Re-Discovered](#)". Our special guest will be Doug Phillips, President of Vision Forum. Both he and host Crane Durham will be discussing the significance of two anniversaries in 2009. One is the 200th birthday of Charles Darwin and the other is the 150th anniversary of his work, "On the Origin of Species". Together these represent a decisive shift in thinking about human origins and the age of the Earth. As part of the broadcast you'll hear from Dr. John Morris of the Institute for Creation Research as well as experts in law and apologetics.

As a special bonus you'll be able to view the latest film from Vision Forum entitled, "The Mysterious Islands". In this beautiful documentary, Doug Phillips traces Darwin's voyage with a team of Christian scientists and investigators to ask a penetrating question - are these Islands a laboratory of evolution, or a testimony to God's marvelous creation?

I hope you'll make plans to [join us for this important two-hour webcast](#), "[Deserting Darwin: The Galapagos Re-Discovered](#)" tomorrow (**Tuesday**) night, **December 8th beginning at 8:05 (EST)**.

Question and Answer:

Question: How are things going with the LLC?

Answer: We are being blessed by a number of people who have a passion for getting the project done, but we have limited amount of staff time to work with them so it goes slowly. We have about 7 units spoken for already and others who we will be meeting with in the coming weeks and months as time allows.
